

Innovate faster by connecting everyone to the data they need.

The Anark Product Suite automates the sourcing and publishing of technical data so you don't have to. Simplify technical data sharing so your work starts faster, and connect conversations with technical content and instructions to avoid miscommunication, errors, scrap, and rework.

ANARK COLLABORATE

Web-based visual collaboration platform with instant chat, where anyone can share, access and discuss technical product data.

What business outcomes are possible with the Anark Product Suite?

- 50% of engineering time freed up by automating the packaging and sharing of data
- 40% reduction of engineering errors by collaborating in the context of shared technical data
- 90% reduction of supplier interaction time by automating Technical Data Packages (TDPs)
- 30% savings on annual parts fabrication costs by sharing 3D-enabled TDPs vs. 2D models alone

Anark products automate the process of finding, packaging and sharing all required technical data, and give you the ability to add functionality and automation capability as you go. Here's how.

Anark products help you evolve from basic file sharing to data-centric technical data collaboration across your entire supply chain, at whatever level of automation you desire.
